Hi, my name is Kathy Hilstein. I own and live in my home at 1564 Los Berros Road in Arroyo Grande. I am writing because I oppose the Leatitia development. My reason for opposing this development is that my well is completely dry now. My family has been without water since the beginning of June. I spend 5 hours every week hauling water from a relatives property so that my family can take showers and flush the toilet occasionally. I have let my lawns die and am very careful to conserve water. My well also went dry in 2009, from July to December. I have been told by professionals that there is no point in drilling a new well because there is no water to be found. I also know that my next door neighbors well has been dry for the last two months as well. I believe that if this Leatitia project goes through the water shortage problem will become much worse.

Sincerely,
Kathy Hilstein
